DILIGENCE IN FILING PETITIONS TO REVIVE AND PETITIONS TO WITHDRAW THE HOLDING OF ABANDONMENT

Once an application becomes inadvertently abandonded, it is incumbent on applicant to act with diligence in providing the response necessary to continue prosecution. Petitions to revive or to withdraw the holding of abandonment must be filed promptly after applicant is notified or otherwise becomes aware of the abandonment. Unless and until the Commissioner accepts applicant's response as sufficient and complete to revive the application or to withdraw the holding of abandonment, the application remains abandoned and the burden continues to rest with applicant to exercise diligence.

Some practitioners have demonstrated a lack of diligence in filing or renewing a petition to revive or a petition to withdraw the holding of abandonment. This appears to have been a conscious decision on the practitioners' part based on the belief that any delay in filing or renewing a petition could be cured by filing a terminal disclaimer equivalent to the period of delay in prosecuting the application. While the Office does have a policy of requiring a terminal disclaimer in those situations where there has been a delay of more than six months in filing a grantable petition to revive an application that has become abandoned [37 CFR 1.137(c), 1.316(d) and 1.317(c)], the terminal disclaimer has never been authorized or set forth in the rules as a substitute for diligence. Indeed, such an interpretation would be contrary to the traditional concept of reasonable diligence and is contrary to the explicit requirement of 37 CFR 1.137(a), 1.155(b), 1.181(f), 1.316(b) and 1.137(b) that a petition to revive be filed promptly. See *In re Application of Takao*, 17 USPQ2d 1155 (Comm'r. 1990).

Notice of Move of Trademark Office and Restructuring of Trademark Examining Operation

With the exception of the Office of the Assistant Commissioner for Trademarks, all offices of the Trademark Section of the U.S. Patent and Trademark Office are being moved to buildings known as the South Tower and North Tower, respectively located at 2900 and 2800 Crystal Drive, Arlington, Virginia, 22202. Contemporaneously with the move, the Trademark Examining Operation is being restructured to increase the number of law offices from nine to 13 and to change the distribution of applications, according to class, among the law offices.

The move will provide the Patent and Trademark Office with the space to accommodate the current number of employees devoted to trademark-related tasks and to consolidate at one physical location most of the offices relating to trademarks.

The official address of the office will remain the same. Therefore, applicants and attorneys should continue to address correspondence to the Commissioner of Patents and Trademarks, Washington, D.C. 20231

As indicated by the following chart, the move is scheduled to take place in six phases. The first five phases will each comprise two floors of the South Tower building. The final phase will comprise the move of the Office of Trademark Quality Review to the North Tower building. All moving dates are tentative.

UNITED STATES PATENT AND TRADEMARK OFFICE
BEFORE THE COMMISSIONER
OF PATENTS AND TRADEMARKS

Cameron Weiffenbach,
Director, Office of
Enrollment and Discipline

v.

William F. Frank
Respondent

Proceeding No. D91-1

FINAL ORDER

The Director and William F. Frank (Respondent), being fully advised, desire to settle this disciplinary matter without the need for a hearing before the Administrative Law Judge. The Director and Respondent therefore present to the Commissioner this agreed upon FINAL ORDER as a settlement of the above-identified disciplinary proceeding.

On November 26, 1990, a complaint and Notice of Proceeding under 35 U.S.C. 32 (Complaint) was filed against the Respondent. Respondent duly filed an answer. The charges against the Respondent were set forth in the following count:

Count

Respondent, a practitioner who is not an attorney, represented, for fees, one or more trademark applicants by advising applicant(s) about registrability of proposed trademarks and/or by prosecuting one or more trademark applications including drafting the application(s) and preparing responses to one or more Office actions, all of which Respondent arranged for the applicant to submit as *pro se* documents. In so doing, Respondent engaged in the unauthorized representation of trademark applicants before the U.S. Patent and Trademark Office, prohibited by 37 CFR 10.14(b), and handled legal trademark matters which the Respondent knew or should have known he was not competent to handle.

1. Respondent has been registered to practice, since 1965, as a patent agent before the PTO. Respondent, as a registered patent agent, being neither an individual who is a member in good standing of the bar of any United States court or the highest court of any State nor recognized to practice before the Office in trademark cases under 37 CFR prior to January 1, 1957, was not and is not authorized to represent trademark applicants before the PTO at any time since he became a patent agent. See 37 CFR 10.14(b), its predecessor. 37 CFR 2.12(b).

2. In response to a Request for Comments, Respondent informed the Office of Enrollment and Discipline in 1988 that, in 1981, Respondent was told by an attorney that the Respondent could not represent trademark applicants. According to the response, the attroney told Respondent to advise any client, whose applications were then pending, of this disability and to suggest that the clients obtain the services of a lawyer to take over the applications or represent themselves before the Trademark Office.

3. In 1981, Respondent was representing foreign and domestic trademark applicants directly before the PTO. In 1981, Respondent wrote letters to his trademark clients, advising them that, "the U.S. rules do not permit a non-attorney to practice trademarks before the Patent and Trademark Office," in one letter and, "I recently learned that a patent agent is not permitted to practice before the Trademark Division...," in a second letter.

4. Respondent prepared trademark and/or service mark applications after 1985, which were subsequently signed and submitted to the PTO as *pro se* applications, including:

A. Margaret Hodge Company
Love Fever® (stylized)
Perfume, Cologne, Body Lotions, Skin Toners, Bath Oils and Soap.
Application Serial No. 73/609,681, filed July 16, 1986
Registration No. 1,455,997, date Sept. 8, 1987

B. Steve Lehrhoff DBA Seal-A-Drive
Seal-A-Drive®
Coating Drivewarys, Parking Lots...
Application Serial No. 73/678,358, filed Aug. 14, 1987
Registration No. 1,545,032, date June 20, 1989

C. Remembrances, Inc.
Remembrances® (stylized)
Reproduction of turn-of-the-century jewelry...
Application Serial No. 73/719,081, filed Mar. 28, 1988
Registration No. 1,514,537, date Oct. 29, 1988

The Love Fever® Application

5. During the prosecution of the trademark application for Love Fever®, Respondent prepared the application for Margaret Hodge. She relied on and was charged by Respondent for assistance in preparing the response to the Office action and for representation before the PTO.

6. In the Love Fever® trademark application, prepared by the Respondent, the trademark examining attorney rejected the trademark application: (a) because it was indefinite whether the person, Margaret Hodge, or the Margaret Hodge Company was the applicant, (b) because the identification of goods covered by the application as filed was indefinite, (c) because the application did not address (i.e., it omitted) labelling information required under the Federal Food, Drug and Cosmetic Act, and (d) because the application omitted the required "now in use" statement. For reasons stated by the trademark examining attorney, this application was improperly prepared by the Respondent.

7. Respondent wrote to the Office of Enrollment and Discipline:

> Since 1986, I have prepared and filed the following trademark applications after carefully and thoroughly explaining during telephone conversation the options of applicants representing themselves, or being represented by an attorney; thoroughly advising the prospective applicants that if they filed the application the Trademark Office would correspond with them and they could talk or write to the Trademark Attorney or have an attorney do so; as well as stressing the requirements for continuous use in interstate commerce for a federal registration.
>
> * * *
>
> That I received a copy of a letter from Miss Hodge to Trademark Attorney Mandir... I telephoned her reminded her I could not talk to any attorney in the Trademark Office and suggested she consult an attorney in New York.

8. Even if respondent phoned Margaret Hodge as he claimed, and "carefully and thoroughly" explained her options of representing herself or having an attorney represent her, Margaret Hodge wrote to the Respondent on November 5, 1986: "The brief [the Office Action] sent, indicates that we must answer each item paragraphed, so that we *do not lose the application for this failure in complying with their itemized request*. POSSIBLY A CALL TO MR. MANDIR [the trademark examiner] WOULD BE BEST... I do owe you monies and would appreciate an update bill."

9. Notwithstanding the telephone reminder in which the Respondent states that he told Ms. Hodge, the applicant, that he, "could not talk to any attorney in the [Patent and] Trademark Office and suggested she consult an attorney in New York," Ms. Hodge wrote to the trademark examiner on February 6, 1987, "Following my telephone conversation of today, I am herewith attaching a copy of a brief sent to Mr. William Frank [Respondent] who is handling this property for me. It is my [applicant's] understanding that Mr. Frank will be in communiation with you [the Trademark Attorney] to cover the matter of the items outlined in your correspondence with me." Applicant's communication with the Office occured approximately three months after the applicant's letter to Respondent, cited in paragraph 8 above.

The Seal-A-Drive® Application

10. On December 7, 1987, an attorney representing the applicant for a service mark registration for Seal-A-Drive®, provided information under 37 CFR 10.24 about alleged misconduct of the Respondent in searching, preparing, filing and prosecuting the original application for the applicant's mark. Respondent performed a "Trademarkability" search, analyzed and reported the results, prepared the application and filed the application.

11. Respondent charged the applicant fees, *inter alia*, for Respondent's "Trademarkability" search and analysis, and for preparation and filing of the service mark application.

12. Respondent prepared and filed the service mark application for Seal-A-Drive®. In the Seal-A-Drive® service mark application, the trademark examining attorney rejected the application: (a) because it omitted a required statement of citizenship, (b) because the description of services coverd by the mark as filed was indefinite, and (c) because the application, as filed, was improperly classified. For reasons stated by the trademark examining attorney, this application was improperly prepared by the respondent.

13. Respondent testifies: "That as to why I `gave Mr. Lehrhoff's address (not your (my)) address as the correspondence addressee [sic] in his trademark application', I believe the Patent and Trademark Office requires correspondence to be sent to an applicant at his address, or to the attorney transmitting the application, or the attorney designated in a power of attorney. Since I did not qualify as any one of the two alternatives to the applicant, giving Mr. Lehrhoff's address was in compliance with the rules."

VOL 1124 ISS 3 MR 19 1991 UMI

14. The Respondent was conscious of limitation on his authority to practice before the U.S. Paten and Trademark Office as a patent agent. To practice in the trademarks and service marks field before the PTO, Resonent intentionally and with deliberation concealed his impermissible practice by using the applicant's address as the correspondence address to evade these limitations.

The Remembrances® Application

15. Respondent prepared the trademark application for Remembrances® for which he charged applicant.

16. By engaging in conduct described in paragraphs 4 through 15 inclusive (drafting one or more trademark applications and drafting applicant's responses to Office Actions or advising applicants on "trademarkability" and/or advising them on the form and content of their application(s) and response(s) to Office Action), Respondent extended the scope of his practice beyond the scope of his representational authority as a patent agent. The totality of his conduct in connection with his trademark practice adversely reflects on his fitness to practice before the Office, proscribed by 37 CFR 10.23(b)(6).

17. By engaging in conduct described in paragraphs 4 through 15 inclusive Respondent handled one or more legal trademark matters which he knew or should have known that he was not competent to handle, because it required the Respondent to be engaged in the unauthorized practice of trademark law under the standard imposed by PTO Rule 37 CFR 10.14(b). Practice of trademark law by non-attorneys, even if they are patent agents, is one form of incompetence, prohibited by 37 CFR 10.77(a)

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
